

Have you had difficulty when registering for an Interest Group?

When you click on the Registration button for an Interest Group, an email window should pop-up with the email address of the Interest Group Facilitator already filled in, however for some of our members nothing happens. As more CALL members move towards accessing their email online, the technology behind the Register Button is not able to work.

The good news is that there is a way around this technical issue. Simply right click on the Register button and you can select “Copy Email Address” from the pop-up menu that appears. You now have the email address of the Facilitator and can send them your registration email.

If you are using a device without a mouse, you may need to Google how to right click. An example is with an Android phone you must use a Chrome browser to access the CALL website and then you hold your finger on the register button for a few seconds for the pop-up menu.
